**PHOTOGRAPHY & ART**

Illustration: Velcro needs to be one strip (7 inches) across the backside of photo at the top.
9. **Division Descriptions**

**People:** People (babies, children, adults, and senior citizens) alone or in a group, active or inactive. Such photos may be photojournalistic, or an interpretative portrait where the person rather than the environment is emphasized.

**Animals - Wildlife:** Category focuses on animals not tamed or domesticated and commonly found in the wild throughout the country and world. Photos can be of wildlife in nature, zoos, and/or petting zoos. Examples include: Deer, snakes, insects, rodents, elephants, etc.

**Animals - Domestic:** Photos focusing on the various animals that have been tamed and made fit for a human environment. To be considered domesticated, the animal must have their behavior, life cycle, or physiology systematically altered as a result of being under human control for many generations. Examples include: Dog, Sheep, Pig, Goat, Cow, Cat, Chicken, Horse, Camel, Goose, Duck, Hamsters.

**Food:** Category is a still life specialization of photography, aimed at producing attractive photographs of food for use in such items of advertisements, packaging, menus and/or cookbooks. NO PHOTOS OF ALCOHOL BEVERAGES ARE ALLOWED. Examples: Thanksgiving dinner, cakes/pies, fruits and place settings, Easter eggs, sandwiches, ingredients, etc.

**Details & Macro:** Getting in close is the name of the game for this category. We welcome pictures of small details that suggest a larger story. This is also the place for macro photographs (although a macro image of a flower might equally go into the Flowers category). THROW—is defined as specific size quilt. Ie: 23”x46” - 39”x75” - measurements of crib and twin mattress. In other words, a piece of polar fleece tied at the edges does not fit this definition.

QUILTS OTHER— (i.e: tie, yoyo or cathedral window) Examples of appropriate classes: M13 or M14.

TIED QUILT – Same definition as quilt with the exception of the method of joining the layers. The layers are joined by tying in intervals consistent and pleasing with the overall design of the top. The tying is done with yarn, string, or pearl cotton and secured on the top of the quilt with a square knot. Buttons may be added for embellishment to the tied quilt. This is not a fleece blanket. Examples of appropriate classes: M13 or M14.

Definitions of techniques used in textile crafts.

BLOCK – A completed design unit or pattern generally in sizes from 4.5” to 20” square. Blocks may be smaller, larger, or a rectangle shape. The block may be a whole piece of fabric, or may be a group of related small pieces of fabric sewn together to make a specific design.

PIECING – A process of sewing together pieces of fabric by hand or machine to make a block (design unit of a quilt), usually square, it can be made of patchwork, applique or a combination.

APPLIQUE – The laying of one piece of fabric upon another and securing the top piece by stitching. An applique design is usually made up of many pieces stitched on in a sequence to a foundation. Example of appropriate classes: M15-M18. Applique may either be machine or hand sewn.

ANIMAL HEALTH ISSUES POLICY & PROCEDURES:
Animals needing care upon and after arrival on the Bell County Expo grounds are subject to this policy and procedures at all times.

The official Show Veterinarian is designated annually by the Bell County Extension Office County Coordinator who will then maintain a memorandum of agreement with said Official Veterinarian. The animal care site on the grounds will be determined by show officials. This location is for the convenience of exhibitors, the show officials and for the quality assurance issues impacting the well being of the animal and the ultimate end user.

The Bell County Youth Fair Association and the Bell County Extension Office will arrange to have an official veterinarian on call and available; however, they do not donate their services or medications. Fees should be discussed before treatment. All medication administered during the livestock show must be administered only by the Official Veterinarian and a written medication record must be filed with the Show officials by the Official Veterinarian.

Exhibitors, parents, volunteers and supervisors with questions regarding animal health issues and/or the need for medications should consult with the Bell County Youth Fair General Superintendents and/or the Extension Designee Ex-Officio to the Fair. These officials will then contact the Bell County Youth Fair Official Veterinarian upon the request and/or the needs of the animal. This can be prior to competition and/or after competition is complete.

Animals receiving performance enhancing drugs per the official veterinarian action (i.e. including, but not limited to, steroids, diuretics, anti-inflammatory, tranquilizers and pain killers) in this manner may be deemed ineligible for competition. The Official Show Veterinarian may remove any animal from competition if the health, safety, or welfare of the animal is in question.

At no time during the time the animal is on the grounds can it be administered any medication by the Exhibitor, Volunteer, Supervisor, and other Veterinarians not designated as Official by the Bell County Youth Fair and Bell County Extension Officials.

This policy and procedure is in place to protect the end user, individual and/or company purchasing the floor animals, and to insure the USDA Meat Quality Assurance Standards per The Wholesome Meat Act as well as assuring fair play for all exhibitors. Proper animal husbandry and animal care standards expected by the participants and attendees will be maintained at all times.
RULE REQUIREMENT: Unless specifically exempted in special rules, all entries and awards are subject to the General Rules. Records may be required by show officials as proof of ownership.

HEALTH RULE: Special care will be taken that animals having diseases of any nature will not be admitted into the show at any time. Unhealed animals from castration, dehorning, docking, or other operations shall be barred from the show. Exhibitors must comply with all rules and regulations set forth by the Texas Animal Health Commission.

DRUGS: All drugs must be administered by a veterinarian. All market animals may be subject to drug tests.

UNETHICAL FITTING RULE: The act of artificially filling animals internally, which would include stomach pumping, drench tubes, or any other method per os (by esophagus), is prohibited.

WHOLESALE MEAT ACT: The USDA Wholesome Meat Act applies to all market livestock. Only animals eligible for immediate slaughter may be brought onto the grounds and exhibited.

(a) Animals must be in good health and carcasses free of drug or chemical residues.
(b) Drug label directions for use and withdrawal periods must be followed.
(c) If drug or chemical residues are found in tissue of carcasses, the entire carcass may be condemned.

Bell County Youth Fair and Livestock Show, Inc. will in no way be liable or responsible for the condition of carcasses or the sale price of the animal. As breeding animals are not entering the food chain, the USDA Wholesome Meat Act does not apply to these animals; however, breeding animals will be closely screened for any performance enhancing compounds. This includes, but is not limited to steroids, diuretics and pain killers.

JUDGING: Exhibitors are responsible for knowing the times at which their animals will be judged. Any animal not presented promptly will be ruled ineligible and barred from competition in the class. No complaint or protest on the grounds that the judge overlooked animals will be considered.

2. Candy products do not contain flour as an ingredient.
3. Refer to page 74 Special Rule #2 for recipe card instructions.
4. All foods must be made from scratch.
5. Microwaves should not be the primary cooking source when making candy.

DEFINITIONS:

Divinity: Very sweet very soft candy made from white or brown sugar, whipped whites of eggs, corn syrup, water, salt and flavoring. If brown sugar is used instead of white sugar the candy is called sea foam. Some recipes for divinity candy specify ingredients such as peppermint, cinnamon, chocolate or candied fruits for flavoring.

Fudge: A thick, firm, smooth candy that is set-up in a pan and cut into squares. Candy can be cooked or uncooked. Degree of difficulty increases with cooked recipes. Ingredients usually include butter or margarine, fat derived from chocolate, milk, and sugar. Other flavor variations might include peanut butter, marshmallow, white chocolate, etc. Nuts may be added.

Brittles and Other Hard Candies: Breaks with sharp edges rather than bends, candy mass is somewhat crunchy. These include brittles, lollipops. No peppermint bark.

Brittle: A candy made from sugar that has been cooked to a high temperature. Nuts are a common addition to brittles. The nuts may be added to the hot sugar and the mixture is poured out in a thin layer. Baking soda may be added to form a light texture. The resulting candy is hard and snaps easily, thus the term “brittle.” This class includes nut brittles, lollipops and other hard candy.

Toffee: A candy formed by boiling a sugar mixture to a high temperature, normally soft crack or hard-crack. Toffee normally has a hard, slightly chewy texture and a rich taste that is gained by adding butter to the sugar mixture. Other additions may include nuts and chocolate. Cracker toffee is not acceptable.

Pralines: (This candy may have two different forms.)
SHAPED COOKIES – Dough is shaped into uniform cookies such as balls or crescents and may be further shaped with an object such as a fork or glass.

Filled Cookies: This is the only cookie class where fillings may be put in a cookie. However, these fillings must be placed into the dough and then baked, it may not be added after the cookie is baked.
Pressed Cookies: Dough is forced through a cookie press or pastry tube creating uniformly shaped cookies. Note: Dough may need to be chilled but these are not refrigerator cookies.

GRAND CHAMPION FOOD PRESERVATION
RESERVE GRAND CHAMPION FOOD PRESERVATION
Steam Pressure Canning Method – Low acid foods must be processed in a steam pressure canner. In order to destroy all bacteria, their spores and the toxins they produce, low acid foods must be heated to a temperature of 240°F and held there for the time specified by the recipe.

High-Acid Foods—These foods have naturally high levels of acid or have a sufficient amount of acid added to them. Bottled lemon juice, citric acid or vinegar labeled 5 percent acidity are sometimes added to recipes to increase acidity. Foods in this category must have a pH of 4.6 or lower. The boiling-water method of processing is adequate for high-acid foods. Generally, all fruits and soft spreads are classified as high-acid foods.

Figs and tomatoes require the addition of an acid so they may be safely canned using the boiling–water method. Fermented foods, such as sauerkraut and brined pickles, and foods to which a sufficient amount of vinegar is added are also treated as high-acid foods. Some recipes may call for high-acid and low-acid ingredients but still be classified as a high-acid product; these recipes must have a pH level of 4.6 or lower.

Low-Acid Foods—These foods have very little natural acid. Vegetables, meats, poultry and seafoods are in the low-acid group. Soups, stews, meat sauces and other recipes which contain a combination of high-acid and low-acid ingredients, yet remain with a pH level higher than 4.6, must be processed as a low-acid product.

Canning procedures used must be indicated on the recipe card.

2. Jars: Based on recommendations by the Extension Food Safety Specialist, NO jars will be tasted or opened for judging. All jars must be Mason, Ball, Kerr, Collection Elite Ball jars or Better Home & Garden. The jar must have a ring on the jar. Standard pint or quart canning jars with brand name on the side or bottom of jar and standard canning lids are required for all classes except J17-J20. J17-J20 Either the standard pint or decorative ½ pint canning jars are acceptable for the Jellies, Jams, Preserves, Marmalades, Conserves and Butters.

3. Entries are limited to one per class. Products for canning may have been bought, but they must have been canned by the exhibitor during the current year.

4. Refer to page 74 Special Rule #2 for recipe card instructions.

5. Entries will be judged on criteria such as pack quality of liquid, color, clarity, container etc. but not flavor.

6. All entries must be prepared solely by the exhibitor.

7. All canned foods shall stay on exhibit until release time Thursday.

8. Exhibitors may not remove scorecards, ribbons, etc., until release time Thursday.

State validation will be honored by the Bell County Youth Fair for breeding gilts. Ear notch numbers must match validation card ear notches or animal will be disqualified and cannot show.

2. Gilts shown in Breeding classes cannot be shown in Market classes. No limit on Breeding Gilts. Breeding gilts must have individual entry cards. NO BOARS.

3. Exhibitors will not be allowed to use powder, oil, paste or paint on swine. No clipping shall be allowed on swine at the show. Violators will be disqualified from the show. “THIS RULE WILL BE STRICTLY ENFORCED”.

4. Antibiotics and sulfonamides have required withdrawal periods. If drug or other chemical residues are found in tissues of carcasses, their entire carcass may be condemned at exhibitor’s expense.

5. Unethical fitting will be deemed to consist of any method of altering the animal’s natural conformation of any part of the animal’s body. Animals showing, in the opinion of the General Livestock Superintendent, signs of having been operated upon or tampered with, with the purpose of concealing faults in conformation or with the intent to deceive, relative to the animal’s soundness, will be disqualified. Every exhibitor in consideration of his entry being accepted by the Bell County Youth Fair agrees to submit any animal entered by him to inspection by a veterinarian appointed by the management, and agrees to have such animal submitted to any test recommended by the veterinarian and decisions reached by the veterinarian will be final.

6. NO show boxes, feed or water in isles. All isles must be kept clear.

These methods are not reliable and not recommended. For example, the open kettle method is not acceptable.

**DEFINITIONS:**

*Boiling Water/Canning Method*— High acid foods are processed in a boiling water canner. The heat is transferred to the product by the boiling water which completely surrounds the jar and two piece cap. A temperature of 212°F is reached and must be maintained for the time specified by the recipe. This method is adequate to destroy molds, yeasts and some bacteria, as well as to activate enzymes.
