IT Managers, et. al,

As per the agency and college Enterprise Account Management procedures recently enacted, section 4.3 states that all accounts over 150 days will be automatically removed.

The attached document describes the details of how this process will occur. We have also posted this process document under the Enterprise IT manager Documentation page (http://agrilife.org/it/itmanagement/) for future reference.

This process should RARELY be activated as units should be managing their inactive accounts via the weekly inactive users report; thus greatly decreasing the likelihood that any account would ever reach 150 days of inactivity.

Please review and familiarize yourself with this process.

Regards,

Alan
