	AngusMobile has been created by the American Angus Association and is designed for anyone with an interest in Angus Cattle. Features include: Angus members have access to their AAA Login herd data and the ability to enter calving book records from the field, Flexibility to tailor the app for your needs for your most used functions with a Configuration option. Simply drag and drop your favorite icons to the toolbar, Search for any registered Angus animal or Angus member.
	ARMtech Application is designed for use by both agents and policyholders of ARMtech Insurance Services, Inc. With the application, you may quote available insurance products, open claims, view actuarial changes, reference Special Provisions of Insurance, track commodity prices, and even stay on top of current Insurance News and Agricultural Headlines. ARMtech provides secure logins for account holders, which allows insureds to view their personal policy information and allow agents to view their entire customer database.
	Baker Hughes Rig Counts. From Baker Hughes Incorporated, This is an interactive map application of Baker Hughes' US rotary rig counts. The Baker Hughes Rig Counts are an important business barometer for the drilling industry and its suppliers. The active rig count acts as a leading indicator of demand for products used in drilling, completing, producing and processing hydrocarbons. The US rig count is released weekly at noon central time on the last day of the work week.
	Cash Grain Bids See what your local grain elevators are paying. With AgWeb's Cash Grain Bids app, simply input your ZIP code to find out cash bids and base levels in your area. Get bids from not one, but five elevators closest to you. This tool is independently contracted by Farm Journal Media and brought to you by Bayer.
	Farm Futures. The power of Farm Futures magazine in an app! This enhanced mobile presentation of the leading management oriented farm magazine features enhanced user-customized markets, market commentary, news and audio updated every business day.
	Search **Fastline** Publication's entire listings database from your mobile device. Find agricultural, trucking, construction equipment quickly. Get equipment values, find dealers, and see current commodity prices.
	iHerd From iApps Pty Ltd, provides the user with lifetime traceability of the herd such as treatments and location movements and is a more simplistic approach than other tiresome software which requires information to be recorded in the paddock and then entered manually into the computer.
	Gavilon app gives up-to-date weather, cash bids, news and market information.

	With the **iRanch** App, you can individually purchase a series of interactive ranch calculators (stocking rate, fed hay predictions, embryo calf breakevens, calf crop breakevens, annual cow cost, cow supplementation, and horse supplementation), which allow you to manipulate input values unique to your ranch for custom output values
	JDLink™ is John Deere's telematics system designed for customers and managers who desire to take their operation to the next level of productivity and efficiency without leaving the office! Using JDLink™ information to optimize a machine is no different than pulling a soil sample to identify what nutrients are needed to produce a high yield.
	Herd – Animal and Livestock Management. From John JR Scott, helps you track your animals, presenting them clearly and efficiently on your iPhone, iPad or iPod Touch. Information tracked by Herd: ● Animal identifier (usually government mandated), ● Name (your personal identifier), ● Sex
	agExchange Stay on top of market trends, and find the best price for your inventory all from your mobile device. agExchange lets you review bids from local elevators on one screen, so you can determine the best time and place to market your crops. Then, maintain your transaction records in one convenient place. agExchange uses cloud synchronization to securely store your sales, futures and options data for easy access between your tablet and smartphone.
	agIndex Get all the markets, weather, news and exclusive agronomic advice, in one quick-to-read dashboard. Newest push features agAhead yield trial results. Receive push notifications customized to your location and crop portfolio to keep up with changes in commodity pricing and insect and weather alerts. agIndex turns your smartphone or tablet into a complete agronomic information source, so you can stay fully informed while in the field or on the road.
	Weed Manager Plus Features a mobile version of the Crop PHD tool, this app delivers accurate weed management recommendations for your region, a tank mixing tool and a measurement conversion calculator for commercial farmers.
	Dragon Dictation is an easy-to-use voice recognition application that allows you to easily speak and instantly see your text or email messages. It's up to five (5) times faster than typing on the keyboard.

	Beef Cow BCS - Track and organize body condition scores for your beef cow herd. Snap a cow's photo, compare to reference images, add an ear tag number, pasture name and save the score for future comparison. Version 2.0.0 updates include: Delete records, Edit/Save Record as a Draft. This will give the producer the ability to go back to score a photo, Calculate Mean/Average - Ability to calculate the mean/average of a group or pasture by date range or specific date, Create Your Own Score Photos.
	TractorHouse. By Sandhills Publishing, the most trusted name in information processing for the construction, farming, trucking, aviation, and computer industries for over 30 years. Features: - Select category - Select manufacturer – scroll or search - Select model or model group – scroll or search
	Square Register Accept credit cards and run your business on the go and in store with Square Register. Process Visa, MasterCard, Discover and American Express, pay just 2.75% per swipe, and access your funds in 1-2 business days. No monthly fees, commitments, or surprises.
	Aphid Speed Scout - Speed scouting is a different way to determine if soybean aphids have reached the 250 aphids per plant threshold. It relies on the number of "infested" plants. Plants are considered "infested" if there are 40 or more aphids on that sample. This helps you quickly determine — yes or no — whether the plant has 40 aphids and would be considered "infested." It then recommends further scouting or treatment options based on the number of "infested" plants in a given area.
	Commodity is a free mobile price watcher for oil, gold, gasoline, natural gas and other commodities. Are you curious about the current price of oil? Want to see if gold can continue its record 5 year run? Then this app is for you!
	NutriAg Ltd. offers an app for farmers, growers and dealers to reference product compatibilities.
	SellSmart will assist farmers in Ontario in selling their grains (corn, wheat and soy) in the commodity market by providing the delayed futures price from CBOT (Chicago Board of Trade) and adjusted cash prices for Ontario grain elevators. A user account is not required and this tool is available to all users.

	Growers Edge users can also receive local market commentary and ag news, compare risk management options and fully utilize the Profit Manager tool to establish profit goals, edit input costs, record marketing transactions and track profit by crop and year.
	FarmLogs makes it incredibly simple to always know what's happening on your farm. Start saving time and money. Ditch the spreadsheets and paper records! FarmLogs Mobile lets you log activities from right out in the field and lets you know when you are going to get rained on. With FarmLogs you can log harvest loads from your mobile device.
	QuickBooks Stay productive, organized, and connected to QuickBooks Online, the #1 cloud accounting solution for small businesses! Try it FREE for 30 days, and enjoy full access to all features on the web, plus the freedom to work anywhere from your smartphone or tablet.
	Field Records Record and maintain pesticide applications, link to specific field locations using satellite mapping, and keep other important crop production information with the Pesticide and Field Records app. Use the convenient product search option to quickly identify Environmental Protection Agency (EPA) product registration numbers and restricted use products.
	The Pesticide Recordkeeping App, or "PeRK", is developed by the University of Nebraska-Extension Pesticide Safety Education Program. PeRK provides an easy, step-by-step data entry process to enter pesticide application data and meets all Nebraska recordkeeping laws for private and commercial/noncommercial pesticide applicators. Location is found by GPS or manually entered. Records are saved within the app and can be exported via email.
	F-Track, is the complete on-the-go farm management app that lets multiple users record and access all their farm information live, wherever they want. Through synchronization with an online server all data entered is constantly updated and when out of range, data is stored locally and updated when possible. This app can be utilized for individual farmers but farms with multiple users will see the real benefit, with all managers and staff able to input data, keeping the most accurate farm book available.
	John Deere Mobile Farm Manager enables instant on-the-go access to all your agronomic data. You can view any map and any report from any year. View historical applications. Analyze historical reports. Use your iPhone® or iPad® GPS to track your position within your fields. Generate grid zones and perform soil sampling tasks and more! Download Mobile Farm Manager today to discover for yourself how you can drive higher levels of productivity and efficiency in your operation.

	The Cattleman+ the tablet edition of The Cattleman magazine, featuring content from TSCRA's print magazine, plus real-time news updates, event information, resources and more.
	The Cattleman Now features news, market reports, event information, TSCRA resources, classified ads and more.
	Revalor This application allows Cattle Feeders to determine the best re-implanting dates for feedlot steers and heifers. It has all-around implant programs that provide the best performance and quality grade results. It also allows for more aggressive implant programs with flexible terminal windows to increase performance. Utilizing more aggressive programs may result in reduced quality grade results unless the days-on-feed are increased.
	Herd Health Manager is a tool for veterinarians to develop customized herd health protocols for cow/calf producers. Includes templates and product details for 1) pre-breeding, 2) pregnancy check, 3) birth, 4) branding, and 5) weaning, as well as veterinary certification of completion of the health program.
	PSU Dairy Cents is a mobile app offering two features – a quick calculation of income over feed costs and price comparison of various forages, grains and commodities to the Penn State Feed Price List and other users of the data base.
	Cattle Max is a mobile-friendly web based app for keeping complete herd records. Welcome to the new way farmers and ranchers are managing their cattle. Now you can enter cattle records at home, at the ranch, and in the pastures. Record information as it happens instead of weeks later.
	Climate helps optimize a farmer's daily decision making by providing up-to-the-minute, field-level weather, field workability, and crop growth stage information. Powered by the revolutionary Climate Technology Platform™, Climate provides data-driven insights about your farm to support decisions that save time and increase profits.
	Farm At Hand - By harnessing the power of the Cloud your farm is no longer managed in notebooks, calendars and on whiteboards, but instead in your smartphone; making information accessible when you need it the most – saving you time and money. Keep your farm at your fingertips with Farm At Hand and manage everything from seed to sale – fields, equipment, commodities and more!

	ArcGIS is a great way to discover and use maps. Maps come to life in ArcGIS. Tap on the map or use your current location and discover information about what you see. You can query the map, search and find interesting information, measure distances and areas of interest and share maps with others. Find community hosted maps from ArcGIS Online – ESRI's online GIS. Alternatively you can use the authoring tools on ArcGIS.com to create your own maps that can be used in ArcGIS.
	Evernote is an easy-to-use, free app that helps you remember everything across all of the devices you use. Stay organized, save your ideas and improve productivity. Evernote lets you take notes, capture photos, create to-do lists, record voice reminders--and makes these notes completely searchable, whether you are at home, at work, or on the go.
	The Event Farm iPad/iPhone application is used for check-in and guest registration at events. The application can be used in conjunction with the web-based Event Farm Ticketing and Guest Registration System or can be used on its own for users that simply want to upload a guest list. The application allows users to check-in guests, leave behind tickets for others, view notes about individual guests (i.e. seating assignments, etc) as well as trigger "Arrival Alerts" that email and/or text users when specific guest(s) have checked in.
	Agro Lite allows Agronomists to create and email paddock/field inspection reports while on farm, have it distributed there and then. Eliminating trips to the office to type up reports. Add your clients details, chemical requirements, crops and pests. Once this is done they are all at your fingertips every time you visit a farm to complete an inspection. Inspections are kept static, forming the basis of the legally binding document, that is signed by both parties direct on the device.
	Numbers is the most innovative spreadsheet app ever designed for a mobile device. Built from the ground up for iPad, iPhone, and iPod touch, it lets you make compelling spreadsheets in minutes — with tables, charts, photos, and graphics — using just your fingers.
	Spray Lite. * Replaces the manual spray log * Records & Stores Spray sheets in one place * Export data in CSV format * Stores Chemical details * Stores all historical chemical applications * Filing Cabinet in the iPad * Live feed of information from the operator as it happens
	DEWALT® Mobile Pro™ is a full-featured calculator and reference tool designed especially for construction pros. It comes with a construction and scientific calculator plus calculator templates for area, length, and volume, as well as estimating studs, drywall, and concrete slabs. In addition to the free capabilities, DEWALT Mobile Pro offers in app purchases for construction topics such as carpentry, concrete, business math, finish materials, trim work, landscaping, site work, and more, all developed with professionals in the field.

	iCrop Trak. Track crop quality, estimated yield, pests, diseases, farm labor, material and equipment use. Keep a record of any farm related variable (forms and measurements are completely customizeable) through a map based visualization. The application uses a forms plus GIS approach.
	Qrafter (Crafter) is a two-dimensional barcode scanner for iPhone, iPad and iPod Touch. Its main purpose is to scan and parse the contents of QR Codes. It can also generate QR Codes when you purchase the "Pro Pack".
	Connected Farm Scout Change the way you use GPS for field mapping and scouting applications in agriculture. Trimble's Connected Farm™ scout app uses your smartphone or tablet for mapping field boundaries, locate irrigation pivots, marking flags, and entering scouting information for points, lines, and polygon areas. Scouting attributes include an extensive list of weeds, insects and diseases, and allows you to log the severity of a problem, crop conditions, and more. Photos can be captured and integrated with your scouting attributes.
	MyTraps.com is a platform to help growers track pest populations and make better pesticide application decisions. The MyTraps mobile app provides a way for growers to record pest data directly from the field.
	Keynote is the most powerful presentation app ever designed for a mobile device. Built from the ground up for iPad, iPhone, and iPod touch, it makes creating a world-class presentation — complete with animated charts and transitions — as simple as touching and tapping.
	Pages is the most beautiful word processor you've ever seen on a mobile device. This powerful word processor helps you create gorgeous reports, resumes, and documents in minutes. Pages has been designed exclusively for the iPad, iPhone, and iPod touch with support for Multi-Touch gestures and Smart Zoom.
	Keynote Remote lets you control a Keynote presentation on your Mac, iPad, iPhone, or iPod touch from another iPhone or iPod touch in the room. While you present, view your current slide and presenter notes in portrait, or the current slide and next slide in landscape. Swipe forward to advance and swipe back to return to the previous slide. Keynote Remote works with your Wi-Fi network, so you can control your presentation from anywhere in the room. Keynote Remote can use Wi-Fi or Bluetooth when connecting to your iPad, iPhone, or iPod touch.

	Dropbox lets you bring all your photos, docs, and videos anywhere and share them easily. Access any file you save to your Dropbox from all your computers, iPhone, iPad and even the Dropbox website!
	Google Drive is one safe place for all your stuff. Upload photos, videos, documents, and other files that are important to you, then access what you need wherever you go, on any device. Get going with up to 15GB of storage. Free.
	Genius Scan turns your iPhone into a pocket scanner. It enables you to quickly scan documents on the go and email the scans as JPEG or PDF.
	Clinometer is the most precise (all you can get with some calculations) slope measurement tool for the iPhone, iPod Touch and iPad using all sides of the device plus the camera. It can be used for simple applications like aligning a frame as well as for more sophisticated fields of applications where an arbitrary slope needs to be measured exactly.
	QR Reader is the most simple & easy QR Reader - 100% FREE. Now scans QR codes, barcodes, printed URLs and even creates PDF files with our NEW "Scan to PDF" feature.
	CalcMoolator PRO is an easy-to-use financial calculator application that saves you time and money. CalcMoolator PRO HD contains over 35 calculators. We know that math is hard, that's why CalcMoolator easy.
	AgStudio MAP is a field boundary and soil sampling application designed to integrate directly with MapShots AgStudio precision agronomy software.
	FieldView Extend the functionality of your 20/20 SeedSense® monitor with FieldView™ from Precision Planting. FieldView functions as a second display in your cab, so you can view real time, row by row maps of your planter's performance. Then, when planting is complete, simply remove the iPad from your cab and have all of your 20/20 data with you at your fingertips – at home, the office, or as a scouting tool in the field.

	Google Earth Fly around the planet with a swipe of your finger with Google Earth for iPhone, iPad, and iPod touch. Explore distant lands or reacquaint yourself with your childhood home. Search for cities, places, and businesses. Browse layers including roads, borders, places, photos and more. Visit the Earth Gallery to find exciting maps such as real-time earthquakes, planes in flight, hiking trails, city tours, and more. Integrated Google Maps Street View allows you to explore the world at street level.
	MyTopo Maps Pro is a next-generation mapping and trip planning app to organize all your outdoor and backroad adventures. If you love maps and the outdoors, this is the app for you. View more than 68,000 topo maps in US and Canada. Also, check out aerial, terrain, street and hybrid maps. Mark points, find places and store all your trip info on the Trip Cloud, a wireless service that allows you to access your trips on any device.
	Google Maps • Comprehensive, accurate maps in 200 countries • Voice-guided GPS navigation for driving, biking, and walking • Transit directions and maps for over 800 cities • Live traffic and incident reports • Detailed information on more than 100 million places • Street View and indoor imagery for restaurants, museums, and more
	Landscout 2 is a cloud-based app, built to analyze high-resolution imagery. Access your personal archive of data for scouting and reporting while you work your field. Landscout 2 is also offline-capable, meaning that once you look at a field's data, it's locally stored and viewable with no internet connection! Don't have an account? Visit satshot.com and start scouting with Landscout!
	Sirrus is the precision ag app that allows you to digitize field boundaries, create soil sampling schemes, check current and historical weather conditions, and sync data with service providers. Current Sirrus features give you the ability to: •Digitize field boundaries directly onto high-resolution, geo-referenced imagery or drive boundaries using GPS •Digitize center-pivots with ease •Create soil sampling schemes using grid, pre-defined management zones, or reference points from previous soil samples
	ScoutDoc is an easy to use field scouting app for farmers and professional crop agronomists. The app allows users to open a GPS map, document field information, and save information collected when scouting or inspecting field crops.
	RevCo Scout™ is an intuitive mobile app for agricultural retailers, professional crop consultants and farmers to identify, record, and report crop issues. Boasting one of the most robust libraries of issues with 1,000's of images and issue types, Scout allows users to identify weeds, insects, beneficials and diseases for 300+ crops including specialty crops.

	iPlanta. The calculator solves for the amount of pesticide, land, or plants based on the information provided. The user chooses to input either US or metric units, but the end calculations are given in both unit systems along with a timestamp and the ability to email the results with the touch of a button.
	SoilWeb for the iPhone is a GPS based, real-time access to USDA-NRCS soil survey data, formatted for the iPhone. This application retrieves graphical summaries of soil types associated with the iPhone's current geographic location, based on a user defined horizontal precision. Sketches of soil profiles are linked to their official soil series description (OSD) page.
	MarketJournal is a universal app that includes segment clips from the weekly show as well as end-of-day futures prices, Nebraska daily elevator prices, local weather, and news from various agricultural sources. The iPhone version even allows you to ask a question from the experts by snapping a photo in the field and sending it to the Market Journal experts.
	Cool Cow is exclusive to Purina Animal Nutrition, this app provides dairy producers with a tool to help manage the impact of heat stress. Contact your Purina representative to prepare your herd for the heat stress season.
	Break Even Be more knowledgeable when making livestock purchases and sales. This is a quick and easy decision tool at your fingertips. With just a few bits of information about your livestock you can know the minimum price that will put you in the black (profitable) and keep you out of the red. This Livestock Break Even Application will calculate the breakeven price for many livestock species as well as three different break even scenarios: Break even Purchase Price, Break even Cost of Gain, Break even Selling Price. Necessary input information is retained for easy use.
	Purina Sow is exclusive to Purina Animal Nutrition, this app provides swine producers with a tool to help manage the impact of heat stress. Contact your Purina Animal Nutrition representative to prepare your herd for the heat stress season.
	Great Lakes Hybrids Seed Guide app for iPad contains everything you'll need to make an informed seed purchasing decision – and maximize your corn, soybean, and alfalfa yield potential. The tools and information contained in one of the industry's first iPad apps will help ensure that you plant smart – and yield more – with Great Lakes Hybrids.
	FieldNET - Remotely manage your pivots, laterals, drip/micro-irrigation systems, and pumps with FieldNET Mobile from FieldNET by Lindsay. FieldNET users can quickly monitor and control irrigation equipment.

	The Weather Channel. Looking for the most accurate weather information available? The Weather Channel's staff of 200+ meteorologists, along with our patented ultra-local TruPoint(sm) weather technology, allow us to provide you with the weather tools you need to plan your day, week, or even the next hour.
	WeatherBug has new real-time enhanced pin-point forecasts for 2.6 Million Locations Worldwide – The industry's most accurate current, extended and hourly weather forecasts for your neighborhood and beyond. With 25% more accurate forecasts for the next 24 hours.
	The Weather Underground iPhone app provides the world's most accurate hyper-local weather forecasts in addition to interactive radar, satellite maps and severe weather alerts. Powered by our unique community of weather enthusiasts reporting live data from weather stations in their own backyards, this crowd-sourced data generates forecasts targeted to your precise location.
	Intellicast HD raises the bar for interactive real-time weather applications. Whether you're checking the forecast or tracking SEVERE storms, Intellicast HD is the only iPad weather app you need. Stunning visualization of wind motion using state-of-the-art particle animation and computer modeling. NOWrad HD Radar; the most timely HIGH-DEFINITION interactive radar for the North America that also does real-time storm cell tracking and map based weather alerts. Future Radar using state of the art TruPoint(sm) technology.
	AccuWeather for iPad brings you the most accurate and personalized local weather details available. This app delivers hourly and long-range forecasts, interactive Apple Maps, and pushed severe weather alerts. Plus, the app lets you translate everything into multiple languages, choose from different display themes, and share weather info through social media. Our users tell us it is "interactive and user-friendly" and "one of the best apps out there."
	GoHarvest application gives combine operators the ability to optimize their machine as they enter the harvest season. Operators choose the model of combine and type of crop. GoHarvest suggests initial settings for that crop type. GoHarvest also features a notes section and photo functionality to give combine operators a premium experience when setting their machine.
	AGCO Parts Books To Go provides interactive parts catalogs which present exploded view drawings. The drawings contain hotspots which are associated directly to part numbers for AGCO branded models allowing you to quickly find AGCO Parts. The app also enables you to create a parts list that you can easily e-mail.
	Case IH My Shed provides engineering's parts manuals, assembly diagrams, and part number lists for YOUR machines. Quickly find Genuine Case IH parts to create a parts list that you can easily send to your favorite dealer. Make quick maintenance decisions in the field with the new features and tools on My Shed 2.1.

News Apps

	Flipboard creates a personalized magazine out of everything being shared with you. Flip through your Facebook newsfeed, tweets from your Twitter timeline, photos from Instagram friends and much more.
	Farm Progress. The app automatically directs you to the right local Farm Progress website, or you can choose your favorite. The app offers access to American Agriculturist, California Farmer, Carolina-Virginia Farmer, Dakota Farmer, Indiana Prairie Farmer, Kansas Farmer, Michigan Farmer, Mid-South Farmer, Missouri Ruralist, Nebraska Farmer, Ohio Farmer, Prairie Farmer, Southern Farmer, The Farmer, The Farmer-Stockman, Wallaces Farmer, Western Farmer-Stockman and Wisconsin Agriculturist.
	DTN/The Progressive Farmer: Ag News— coverage on a broad range of topics including breaking industry news, markets, crops, livestock, equipment, farm business, land management, ag policy, and farm life. TEXAS A&M AGRILIFE EXTENSION

	The Ag PhD **Field Guide** helps you to identify problem pests out in your field. You can browse weeds and insects by name and view photos and read control recommendations. The Ag PhD Field Guide also gives you the most up-to-date agronomy information through the FMC HatchTrak newsletter and the Ag PhD University.
	AGRIplot allows you to plot any area on a map. Simply walk around your property and add a landmark point, or drag and drop pins anywhere on the map. AGRIplot will automatically calculate the area enclosed by the points and provide the distances between each point. Interest points allow you to identify additional features for your plot. You can even take pictures associated with each landmark or interest point for a visual representation.
	CVP Vet the most complete and concise reference available. Features over 2,300 pharmaceutical, biological, feed medication and parasiticide product monographs. Over 130 manufacturers/distributors and their contact information. Product Use and Product Category Index. Species specific charts including Anthelmintics/Parasiticides, Biologicals, and Withdrawal Times. This application requires an Internet connection.
	Barchart Stocks, Futures and Forex is the most complete financial app currently available, featuring free real-time stock prices. Track stocks, futures, forex markets, ETFs & indices. In-depth coverage on all symbols (including charts, technicals, fundamentals, opinions) is available at your fingertips on our advanced multiple watchlists, making it easy for investors and market followers to track and watch the markets.
	Remember The Milk (RTM) for iPhone, iPod touch and iPad connects with the popular online service of the same name. With millions of users worldwide, Remember The Milk is everywhere you are: from mobile to the web to apps including Outlook, iCal, Gmail, Google Calendar, Twitter, and more. Take your to-do list anywhere with this feature-packed app; never forget the milk (or anything else) again.
	AGCOMMAND App allows you to monitor your operation from anywhere, anytime. AGCOMMAND App provides you with a friendly way to manage your vehicles right from your iPhone/iPad. Monitoring your vehicles is now even easier and faster than before!
	Ag Weed ID is an in-hand tool to help producers identify weeds during scouting in 6 major row crops (corn, cotton, rice, sorghum, soybeans, and wheat), from the experts at Penton Farm Progress Group. Our database includes information and images for about 75 of the most common weeds, and enables you to narrow your search by crop, season, and location so that you can compare weeds that might be relevant to you right now.

	TankCalc US. By Syngenta Agro AG, is a unique tool for easy and efficient calculation of filling plans for spraying. It saves time and ensures high accuracy in the tank mixing based on area, tank size, product, dosage and driving speed. The application uses the United States customary system of measurement. The TankCalc has features like: Filling plan with the amount of products, water and number of tanks, summary with the total consumption of products and water, recommendation for choice of ISO nozzles, special features minimizes filling - and driving time.
	Corn N Rate Calculator - This app is designed to assist producers in selecting a Nitrogen (N) rate that improves profitability when N and corn prices fluctuate. Maximum return to N (MRTN) is the N rate that will be most profitable for a particular N:Corn price ratio.
	The **Variety Selector Tool** from Bayer CropScience helps you find the right variety for your field and calculate all of your cottonseed needs in a single application. Great for growers, seed dealers, consultants and agronomists, the Variety Selector Tool lets you: • Compare and evaluate seed varieties • Choose the right variety for your fields • View variety images and growing videos • Input the seeding rate for each variety • Calculate acres per bag • Determine total bag/box needs
	The Farm Progress **Growing Degree Days** application measures the maturity of your crop by viewing current and past growing degree days data for your farm's location. Growing degree days (GDD) are a measure of heat accumulation used in agriculture to predict the date that crops will reach maturity.
	N Price Calculator. This app allows you to compare the price of various forms of nitrogen fertilizer products in terms of their price per pound of nitrogen. The app then lets you add the price to a list of prices on a separate screen. In this manner, you build a price list to compare.
	Documents To Go – Office Suite. Looking to access your Microsoft Office ® files at any time? All you need is your favorite iOS device and Documents To Go to be constantly connected!
	YieldCheck by Precision Planting Inc. provides growers with a simple way to calculate and store corn yield estimates. Users can organize estimates based on client, farm, and field. Also see the location of all of your estimates on a map with satellite imagery. Subsequently growers can use the field report feature to see just how much of a difference one additional ear per acre can mean to their operation.
