## Summary

**Cattle and Cattle on Feed:** Final Estimates by State, 2004-2008, U.S. Department of Agriculture, Agricultural Statistics Board, National Agricultural Statistics Service, Statistical Bulletin No. 1019.

**Introduction:** This bulletin presents final estimates, including revisions made by the Agricultural Statistics Board (ASB), for the production years 2004 through 2008. Cattle inventory and calf crop, inventory by class, monthly cattle on feed numbers, and annual estimates of cattle on feed were published during calendar years 2004-2008 in periodic ASB reports. Data included in this publication provide a historic record and a benchmark for current estimates. The number of livestock operations and inventory by size groups will be published in Livestock Operations - Final Estimates 2003-2007, Statistical Bulletin 1021. Inventory values and value per head will be published in the Meat Animals, PDI - Final Estimates 2003-2007, Statistical Bulletin No. 1026.

**Procedures:** Revisions were made after a thorough review of the original survey data and all additional data now available, including the 2007 Census of Agriculture. Other data series considered included slaughter, exports, and imports. The relationship between inventory levels, calf crops, death loss, exports, and slaughter were compared to historic totals. The 2004-2008 estimates shown herein are considered final and will not be revised again.

**Agricultural Census Publications:** The U. S. Department of Agriculture's National Agricultural Statistics Service (NASS) released several products from the 2007 Census of Agriculture on February 4, 2009. The Census is the leading source of statistics about the Nation's agricultural production and the only source of consistent, comparable data at the county, State, and national levels. The Census includes all places from which \$1,000 or more of agricultural products, including government payments, were produced and sold, or normally would have been sold, during the census year. Census publications also include demographic items such as sex of operator, residence on or off the farm, days worked off farm, years present on farm, age group categories, race, and number of persons living in each household.
